Internal Valve Design

ENGINEERED FLEXIBILITY
- Top or Bottom Loading
- "Zero Leak" Transfer Valve
- Bolted or Welded Assembly
- Drop-In Custom Fit
- Crossover Equalization
- Double Block & Bleed Isolation
- Split Valve Transfer
- Built-In Accessory Items

External Valve Design

OPERATIONAL RANGE
- Flow Range: 1 GPM to 2,500 GPM
- Pressure Range: -15 PSI to 3,300 PSI
- Temp. Range: -20°F to 600°F
- Viscosity Range: 1 SSU to 10,000 SSU
- Connection Size: 1" to 16"

MATERIAL OPTIONS
- Carbon Steel
- Stainless Steel
- Combination CS & SS

HILCO® Filters and Systems are manufactured to the following Codes
- ASME (American Society of Mechanical Engineers)
- API-614 (American Petroleum Institute)
- AS1210 (Australia)
- ATEX (Europe)
- ISO (International Organization for Standardization)
- 97/23/EC (PED, Europe)
- BS EN 10204 (British Standard)
- CSA B51 (CRN, Canada)
- DOSH (Malaysia)
- NR-13 (Brazil)
- Others:
  - Special Certifications, Domestic

Variety of Industries
- Power Generation
- Machine Tool
- Petro-Chemical
- Marine
- Primary Metals
- Automotive
- General Manufacturing
- Original Equipment Mfg’s

Custom Design

Standalone Transfer Valves
