Uninterrupted Fluid Flow in Coolers and Heat Exchangers

The Hilco split valves are available in a variety of sizes that are precision-machined in either carbon steel or 304/304L, 316/316L stainless steel.

Hilco offers valves for both shell and tube coolers and plate and frame heat exchangers, as well as simultaneous transfer of both valves with one handle.

Standard Design

- 1 1/2", 2", 3", 4", 6", 8"
- 150-lb ANSI RF Flanged
- Adjustable Linkage Lengths

Optional Design

- Pressures to 4500 psi
- API 614 Models Available
- Inlet/Outlet Configurations Meet User Requirements
- Special Nozzle/Connection Orientation
Hilco also engineers and manufactures the following products:

- Filter Vessels
- Cartridges
- Vent Mist Eliminators
- Lube Oil Conditioners
- Oil Reclaimers

Hilliard has manufactured specially engineered products since 1905.

- Turbine Engine Starter
- Star PolyPress
- Welded-in Transfer Valve
- Vent Mist Eliminator

The Hilliard Corporation reserves the right to change specifications and dimensions at any time. Please contact the factory for the most current information.
